Telephone and video entry phone in a single, efficient unit

Bpt has taken the communication and control functions of a tabletop telephone and video entry phone, and packed them into a single product to meet the rising expectations of today's homes and offices: reduced dimensions, simplified and optimized installations, unbeatable functionality and comfort.

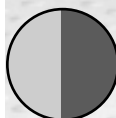

Technology in its most elegant form

The slim, wide platform gently arches its back against the futuristic oval stand. The monitor, in both colour and black & white versions, provides a bright, clear picture regardless of your viewing angle. The ergonomic form of the receiver and keys means it is easily operated and a pleasure to use. The fruit of a competition workshop involving experts in architecture, technology and sociology, Integra's elegant design fits in perfectly with any kind of interior.

4" LCD active matrix colour monitor

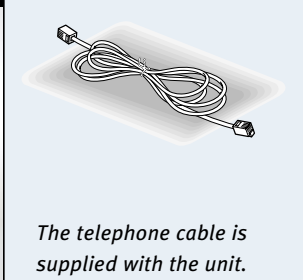

5" black and white monitor

IMT/200 (5" b/w picture tube)

IMTC/200 (4" LCD display)

The telephone cable is supplied with the unit.

Compatible with system 200

A telephone and video entry phone with a quality monitor - either colour or black & white. With all the convenience of the hands-free function and numerous auxiliary keys, Integra is a functional instrument that also makes an elegant statement with its design.

Telephone interface

The IT/200 interface must be installed to integrate the telephone functions with the video entry control system.
